

Final Express Terms

The Office of Statewide Health Planning and Development (OSHPD) proposes to adopt the 2006 edition of the International Building Code of International Code Council for codification and effectiveness in the 2007 edition of the California Building Code as presented on the following pages, including any necessary amendments. The above identified state agency further proposes to:

- Repeal the 1997 edition of the Uniform Building Code of the International Conference of Building Officials;
- Repeal amendments to model codes that are no longer necessary, repeal or amend existing building standards that are not addressed by a model code;
- Adopt new building standards that are not addressed by the model code proposed for adoption.
- Adopt new necessary amendments to the model code proposed for adoption;
- Relocate existing adopted and necessary amendments to the current model code into the format of the model code proposed for adoption. **These amendments with editorial changes only are outside the rule making and are not subject to public comments.**

FORMAT OF EXPRESS TERMS:

- Following each section or chapter, list of the specific statute(s) that mandates the adoption of the regulation, which are called authority statutes, and list of the specific statute(s) that clarify the subject matter being implemented, interpreted, or made specific by the authority statutes, which are called reference statutes are shown.
- Model code text is shown in regular type face.
- In model code sections (Non "A" Chapters) proposed for adoption and modification, new proposed amendments modifying the model code are shown underlined and *italicized*, and model code text proposed to be deleted, but will apply to other applications, uses or occupancies in ~~strike-out~~.
- Chapters 16A, 17A, 18A, 19A, 21A, 22A and 34A are applicable to OSHPD 1 & 4 facilities (Hospitals and Correctional Treatment Centers). In these Chapters, where sections are proposed for adoption and modification, new proposed regulations modifying the model code text are shown underlined and *italicized*, and model code text proposed to be deleted are shown in ~~strike-out~~ and shaded. If approved by the Commission, the model code text will be removed from these chapters and the deletion will be shown as follows: * * *.
- When amending a provision of Code amendments they are shown *italicized* and additions underlined.
- When adopting building standards that are not addressed by the model code amendments they are shown *italicized* and underlined.
- Repeal of unnecessary existing amendments in CBC 2001 is shown at the beginning of each chapter after the adoption matrix with division, section or subsection numbers in ~~strike-out~~. Actual text of the repealed amendments can be found in CBC 2001 and are not reproduced in the express terms.
- Relocation of necessary existing amendments in the CBC 2001, which are not repealed, is shown *italicized* in the express terms. Relocated amendments in the express terms show where they are relocated from in CBC 2001. Modifications to existing amendments are shown *italicized* and underlined. Part of the existing amendments that are not carried forward is shown *italicized and in strike-out*. When only a small part of the large existing amendment is carried forward, entire amendment is shown as repealed at the beginning of each chapter after the adoption matrix and part that is carried forward is shown *italicized* and underlined in the express terms.

First column of the adoption matrix shows the section number of CBC 2001 amendments that are relocated. Second column of the adoption matrix shows the CBC 2007 section numbers corresponding to CBC 2001 section numbers in column one.

- Deletion for 15-day express terms and editorial deletion after 45-day public comment period are shown *italicized* and in double ~~strike-out~~.
- Additions for 15-day express terms and editorial additions after 45-day public comment period are shown *italicized* and double underlined.
- Draft amendment text in 9 pt., Arial font.
